

# Interaction Design

## Module Assignment 3: Create an Adobe XD prototype

### Goal

To carry on the work done during this course and become familiar with Adobe XD.

### Brief

For this assignment we will be creating a multi-page prototype of the Shadowball website. We will be taking our research, personas, storyboards, and low-tech prototype and building it into a working prototype using Adobe XD (you can also use Sketch). You must include a short report on your process and thoughts of your prototype.

- Pages to be designed: (4 Pages).

	Page	Description	URL
1.	Product Detail Page	1 Product only, one page only SHADOWBALL® PRO SIZE 3	<a href="https://shadowball.co.za/product/shadowball-pro-size-3/">https://shadowball.co.za/product/shadowball-pro-size-3/</a>
2.	Homepage	A layout in accordance to your research.	<a href="https://shadowball.co.za">https://shadowball.co.za</a>
3.	Shop Landing Page	A list of all possible categories as planned in your Information Architecture	<a href="https://shadowball.co.za/shop">https://shadowball.co.za/shop</a>
4.	Category Landing Page	A list of items in a given category eg. Shadowballs	<a href="https://shadowball.co.za/product-category/collectors-shadowballs/">https://shadowball.co.za/product-category/collectors-shadowballs/</a>

# Level 1 Process

1. Create a desktop prototype for your website.
2. Watch the following course about creating a prototype on Adobe XD.
3. **WATCH:** Adobe XD: Design a Website
4. Take the paper prototype you were working with in Module 1 and use it as a guideline to build your website. Using your research and understanding of the personas you need to decide how many pages to create, how the user will navigate, etc.
5. The design should be well thought out and look good. You don't have to make a logo, but you can if you want to.
6. Make sure all the links work in your prototype and take the user to the correct pages. Imagine you were submitting this design to a potential client who was going to use the prototype.
7. Share the prototype online and share the link in your delivery. If you aren't sure how to share your prototype, please check out this link:

# Level 2 Process

Create a mobile prototype for your website.

Watch the following course about creating a mobile prototype on Adobe XD.

**WATCH:** Adobe XD: Designing and Prototyping a Mobile app
